L Bar Sealer

L Bar Sealer also known as L Type Sealer is a seal and cut machine which is ideal auxiliary equipment to work with shrink packaging machine and can be used separately as well, mainly used for cutting the shrink film in required sizes. The sealing & cutting control is using of instantaneous heating. Speedy sealing & cutting, electricity saving. Available to change the sealing time & cutting and temperature required upon the thickness of plastic film. The machine suitable to seal and cut PVC and POF Film.

L Bar Sealer is widely used in industries such as foodstuff, beverage, pharmacy, cosmetics and pesticide for containers with labels like glass bottle, plastic bottle, paper cup etc.

L Bar Sealer may combined with a shrink tunnel or heat gun to an L sealer to produce tightly shrink wrapped packages for shrink wrapping.

2 IN 1 Seal & Shrink Packaging Machine

BSF Series 2 IN 1 Seal & Shrink Packaging Machine combines sealing with shrinking into onestep. It suitable for all kinds of shrink films such as PVC, POF, PP etc. BSF Series design with transparent cover makes the process of sealing & cutting and shrinking be visible. Perfect sealing without cracking and coking for adopting nano-fiber cutterholder and anti-sticking thermo-stable nichrome cutter. Special-designed roller with pin to produce small holes on the film to release air.

BSF Series 2 IN 1 Seal & Shrink Packaging Machine is common to use in place where there is restriction on space or limited packing area, such as supermarket, monopolization shop, office and some laboratory etc. BSF Series is widely applied for outer shrink packing of various products or shrink wrapping the combined products.

TECHNICAL DATA

◀ Model	BSF-5540
Voltage	1 Phase 240V
Total Power	4000W
Max. Packing Dimension	450mmL × 300mmW × 250 mmH
Max. Sealing Dimension	500mmL x 450mmW
Machine Structure	Metal with Powder Coated
Machine Weight	140 kgs
Machine Dimension	1985mmL × 720mmW × 1080mmH
