## *Direct Heat Sealer / Constant Heat Sealer*

Direct Heat Sealer (also known as Constant Heat Sealers) are equipped with a thermostat or an electronic thermostat controller that accurately controls the temperature from 30°-550° F (0°-300° C). Depending on the heat sealers model a constant heat sealer can seal material up to 15mm in width and 8 mil in thickness. Direct Heat Sealer with constant heat controller maintain constant heat in both of the device's jaws to provide better heat penetration when sealing thicker materials and create wide seals on heavier bags.

Direct Heat Sealer are a specialty sealer that is not for the common use of bag sealing operations, but especially ideal for thicker material such as coated aluminium foil, Kraft paper, cellophane, mylar, coated PP.

## *DHS Series Constant Heat Sealer*

DHS Series Constant Heat Sealer are excellent for sealing polycell films, humidity-proof cellophane film, polyethylene film, aluminium foil coated bags and gusset bags.

DHS Series Constant Heat Sealer is equipped with a thermostat complete with pedestal and stand.

### TECHNICAL DATA

MODEL	DHS12	DHS18
Voltage	1 Phase 240V	
Sealing Power	150 W	180 W
Sealing Length	300 mmL	450 mmL
Sealing Width	2	
Sealing Jaw	Bottom Only	
Heat Time Setting	Thermostat	
Working Table Height	750mmH	
Machine Structure	Wooden Table Top with metal frame	
Machine Dimension	400mmL	550mmL
	330mmW	330mmW
	900mmH	900mmH
Machine Weight	15Kg	17Kg

\*\* Customized specification available upon request.
