Vacuum Packaging Machine

Vacuum packing reduces atmospheric oxygen, limiting the growth of aerobic bacteria or fungi, and preventing the evaporation of volatile components. Products with vacuum packing can be prevented from oxidation, going mold, insects or getting damp, thus can be kept fresh for longer time.

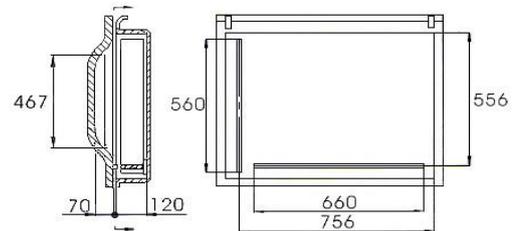

Vacuum packaging machine is commonly used in food product and industrial to maintain fresh food's freshness or prolong product's shelf-life which suitable for solid, powdery and liquid products such as fresh meat, seafood, pickled vegetables, agricultural products, tea leaves, herbs, powder, spices, bean paste and prepared foods...etc. For Industry such as electronic or medical use vacuum packing for Electronic parts, hardware products, medical instruments, medicine to prevent oxidization. In clothing, bedding and plastic industry vacuum packing greatly reduces the bulk items for more storage space.

DZ 800L - Large Single Chamber with Digital Control Panel

DZ800L Digital Single Chamber Vacuum Packaging Machine operate with digital panel with smart intelligent control system for operation program in memory. Design with two difference size sealing bars increase the flexible of packing size. Large vacuum chambers and longer seal lengths allow for vacuum packaging greater quantities per cycle, increasing productivity.

DZ800L Digital Single Chamber Vacuum Packaging Machine are typically used medium-volume packaging. These vacuum sealers are ideally for food processors and industrial manufacturers.

DZ800L Digital Single Chamber Vacuum Packaging Machine is a plug in units which is easy to operate with setting program system, machine will finish the whole programs of vacuum extraction, sealing and cooling automatically. Fully stainless steel construction, features maximum durability and convenient cleaning. Transparent upper lid provides clear visibility for packaging operations. Machine design with roller floor-standing design for easy moving.

TECHNICAL DATA

Model	DZ 800L
Voltage (V)	3 Phase 380V
Motor Power (W)	900 x 2
Sealing Power (W)	1000
Ultimate Vacuum Pressure (Kpa)	1.0
No. of Sealing Bar	1 - 2
Sealing Length (L X W) (mm)	559 x 660
Sealing Width (mm)	10
Control Panel	Digital
Chamber Dimension (L X W X H)(mm)	606 x 806 x 190
Vacuum Pump Rate (m ³ /h)	20 x 2
Chamber Structure	Aluminum Chamber
Machine Structure	Stainless Steel
Machine Dimension (L X W X H)(mm)	886 x 704 x 902
Machine Weight(Kg)	235
