HC Series Vacuum Packaging Machine

Vacuum packing reduces atmospheric oxygen, limiting the growth of aerobic bacteria or fungi, and preventing the evaporation of volatile components. Products with vacuum packing can be prevented from oxidation, going mold, insects or getting damp, thus can be kept fresh for longer time.

Vacuum packaging machine is commonly used in food product and industrial to maintain fresh food's freshness or prolong product's shelf-life which suitable for solid, Powdery and liquid products such as fresh meat, seafood, pickled vegetables, agricultural products, tea leaves, herbs, powder, spices, bean paste and prepared foods...etc. For Industry such as electronic or medical use vacuum packing for Electronic parts, hardware products, medical instruments, medicine to prevent oxidization. In clothing, bedding and plastic industry vacuum packing greatly reduces the bulk items for more storage space.

HC 613 - Large Single Chamber

HC613 Single Chamber Vacuum Packaging Machine equipped with Germany-BUSCH vacuum pump. HC613 design with wider chamber and 140mm depth allow for vacuum packaging greater quantities per cycle, increasing productivity. HC613 are typically used for medium-volume packaging. These vacuum sealers are ideally for food processors and industrial manufacturers.

HC613 Single Chamber Vacuum Packaging Machine design with wider vacuum chamber provide the ability to run as many bags per cycle as the sealing bar length will accommodate. Bags are lined up, side by side, along the length of the sealing bar. Fully stainless steel construction, features maximum durability and convenient cleaning. Transparent upper lid provides clear visibility for packaging operations. Machine design with roller floor-standing design for easy moving.

HC Series Vacuum Packaging Machine are long lasting machineries built with selected high quality electronic components and therefore will require lesser maintenance.

TECHNICAL DATA

MODEL	HC 613(1)
Voltage	3 Phase 415V
Vacuum Pump	2 HP 40m ³ /hr (Busch)
Packing Capacity	0-2 times/min
Chamber Dimension	570mmL x 800mmW x 140mmH
Sealing Length	780mm
Sealing Width	10
No. of Sealing Bar	2
Control Panel	Timer
Chamber Structure	Aluminum
Machine Structure	Stainless Steel
Machine Dimension	810mmL x 850mmW x 910mmH
Machine Weight	220Kg
