HC Series Vacuum Packaging Machine

Vacuum packing reduces atmospheric oxygen, limiting the growth of aerobic bacteria or fungi, and preventing the evaporation of volatile components. Products with vacuum packing can be prevented from oxidation, going mold, insects or getting damp, thus can be kept fresh for longer time.

Vacuum packaging machine is commonly used in food product and industrial to maintain fresh food's freshness or prolong product's shelf-life which suitable for solid, Powdery and liquid products such as fresh meat, seafood, pickled vegetables, agricultural products, tea leaves, herbs, powder, spices, bean paste and prepared foods...etc. For Industry such as electronic or medical use vacuum packing for Electronic parts, hardware products, medical instruments, medicine to prevent oxidization. In clothing, bedding and plastic industry vacuum packing greatly reduces the bulk items for more storage space.

HC 623 - Large Single Chamber

HC 623 Single Chamber Vacuum Packaging Machine equipped with Germany-BUSCH vacuum pump. HC 623 design with large vacuum chambers and longer seal lengths allow for vacuum packaging greater quantities per cycle, increasing productivity. HC 623 are typically used for medium-volume packaging. These vacuum sealers are ideally for food processors and industrial manufacturers.

HC 623 Single Chamber Vacuum Packaging Machine design with wider vacuum chamber provide the ability to run as many bags per cycle as the sealing bar length will accommodate. Bags are lined up, side by side, along the length of the sealing bar. Vacuum Chamber design with flat working platform for easy cleaning and ideal for production line attachment. Machine design with roller floor-standing design for easy moving.

HC Series Vacuum Packaging Machine are long lasting machineries built with selected high quality electronic components and therefore will require lesser maintenance.

TECHNICAL DATA

MODEL	HC 623(1)
Voltage	3 Phase 415V
Vacuum Pump	2 HP 40m ³ /hr (Busch)
Packing Capacity	0-2 times/min
Chamber Dimension	580mmL x 830mmW x 160mmH
Sealing Length	800mm
Sealing Width	10
No. of Sealing Bar	2
Control Panel	Timer
Chamber Structure	Stainless Steel
Machine Structure	Stainless Steel
Machine Dimension	930mmL x 760mmW x 1060mmH
Machine Weight	250Kg
