Labelling Machine

Labelling machines are machines that dispense, apply or print-and-apply labels to various items, products, containers, or packages. Labelling machines are designed to apply labels to a variety of products and packages. Because of their multiple uses, different types of labels are able to adhere to a variety of surfaces, such as aluminium bottle, glass, plastic bottle.

Labelling machines able to combine with coding or marking facilitate as hot stamping machine, inkjet or laser jet printing which reduce workers and improve printing efficiency.

Labelling machines can easily be integrated to any new or existing processes and common used in the fields of domestic electrical appliance, foodstuffs, general merchandise, medicine and chemical industries. Labelling machines improve the production speed and efficiency, save time and labour saving.

LM Series Semi Auto Labelling Machine

LM Series Semi Auto Labelling Machines are suitable for Labelling on Round Vials, Bottles and other round objects. LM Series Semi Auto Labelling Machines easy to operate and simple adjust to meet difference size of bottle. LM Series build in with microcontrollers and Sensor to stabilize the machine performance.

Optional: a. Coding Machine or Printer

LM130TP with Printer

TECHNICAL DATA

Model		LM130T
Rated Voltage		1 Phase 240V / 150W
Container Size	Diameter	25mm - 140mm
	Length	50mm - 140mm
Label Size	Length	10mm - 150mm
	Width	10mm - 130mm
Label Inner Diameter		75mm
Label Outer Diameter		< 200mm
Packing Speed		0 - 40 bottle / min
Liner Thickness:		2 mil - 10mil (smoothness will affect feeding - a liner that is too slippery or too thin will slip through the drive rollers)
Label + Adhesive Thickness:		5 mil - 15 mil
Machine Structure		Aluminium
Machine Dimension		570mmL x 230mmW x 530mmH
Machine Weight		25Kg
