## *Friction Feeder*

Friction Feeder is a high speed conveyor complete with automatic feeder. The feeder automatically separated bundle of plastic bags or cards and transferred to the conveyor belt.

Friction Feeder is special design to attach with coding or marking facilitate as inkjet or laser jet printing which reduce workers and improve printing efficiency. Friction Feeder is widely used for product coding and printing purposes.

Ours Cartion Feeder always combine with the SOJET Thermal Inkjet Printer with High Resolution and High Speed Printing.

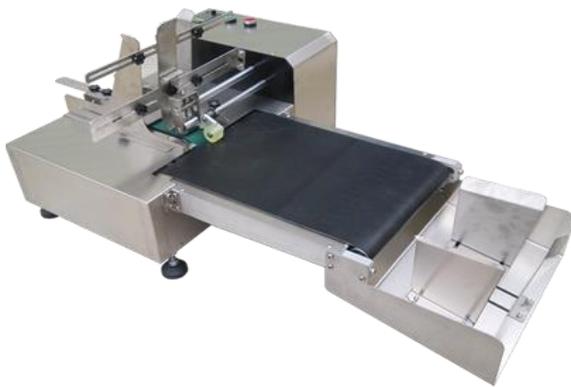

Friction Feeder can easily be integrated to any new or existing processes and common used in the fields of domestic electrical appliance, foodstuffs, general merchandise, medicine and chemical industries. Friction Feeder improve the production speed and efficiency, save time and labor saving.

## *PBC - T Table Top Friction Feeder*

PBC-T Series Table Top Friction Feeder is the perfect entry model friction feeder for the separation of flat products is ideal for the automatic feeding of blister cards, paper card and pouches.

PBC-T Series friction feeder has been developed especially for the medium performance area and use frequency drive motor for production stability and management complete with adjustable feeding speed.

Optional: a. Counter

### TECHNICAL DATA

◀ Model		KST-PBC30T
Rated Voltage		1 Phase 240V / 60W
Product Size	Length	50mm - 300mm
	Width	60mm - 300mm
	Thickness	1mm - 5 mm
Product Material		Boxes / Card
Conveyor Speed		0 - 50m / min
Conveyor Outfeed Dimension		300mmL x 300mmW
Speed Control		Frequency Drive Motor
Machine Structure		Stainless Steel
Machine Dimension		800mml x 400mmw x 200mmh
Machine Weight		35Kg
