Liquid Filling Machine

Liquid fillers or filling machines are important equipment in various industries like cosmetics, pharmaceutical, food & beverages industries where liquids are to be packed in various types of containers. Liquid filling machines can improve production speed with efficiently packed into containers and less wastage.

SFQG 500 Semi-Auto Paste Filling Machine

SFQG 500 Semi-Auto Paste Filling Machine is best suited for viscous products that are paste, semi paste, or chunky with large particulates. Piston fillers are primarily built to meet food grade standards and commonly fill heavy sauces, salsas, salad dressings, cosmetic creams, heavy shampoo, gels, and conditioners.

SFQG 500 Semi-Auto Paste Filling Machine is simple to operate. After push the operate paddle the piston is drawn back in its cylinder and the product is sucked into the cylinder. Another valve continue operate to pushed product out of the nozzle instead of back into the hopper. The volume of the product that is sucked into the cylinder is the setting volume that will be dispensed into the container.

SFQG 500 Semi-Auto Paste Filling Machine operate quickly and provide uniform results. It's easy to learn to operate them. In addition to their ease of use, they are also energy efficient, reliable and durable.

TECHNICAL DATA

MODEL	SFQG500
Filling Range	50ml - 500ml
No of Filling Nozzle	1
Storage Tank Volume	20 litre
Filling Accuracy	± 1 - 2%
Filling Speed	0 - 25times / min
Air Pressure	4-6kg/cm ²
Machine Structure	304 Stainless Steel
Machine Dimension	1200mmL x 295mmW x 680mmH
Machine Weight	32Kg
