Label Shrink Packaging Machine

Label Shrink Packaging Machine special design for shrinking label of bottles, jars and canned products use. Special design for heat tunnel with narrow width to fit the bottle size and extend tunnel heating length, with the adopts of hot air circulation for perfect label shrink.

Label shrink tunnel is widely used in industries such as foodstuff, beverage, pharmacy, cosmetics and pesticide for containers with labels like glass bottle, plastic bottle, paper cup etc.

Label Shrink Packaging Machine may combined with the sleeve labelling system or auto production process to improve the production speed and efficiency.

SLC-G Series Bottle Cap Label Shrink Packaging Machine

SLC-G Series Bottle Cap Label Shrink Packaging Machine special design for bottle cap shrinking for bottles, jars and canned products use. SLC-X Series heat tunnel with special design of narrow width as bottle cap size and extend tunnel heating length by the adopts of hot air circulation for perfect label shrink.

SLC-G Series Label Shrink Packaging Machine equipped with desired modern specifications of digital temperature control, energy saving and fast film shrinking capability.

TECHNICAL DATA

◀ Model	SLC1510G
Voltage	3 Phase 415V
Max. Power	18800 W
Temperature Control System	Digital Temperature Controller
Shrinking Film Material	PVC / POF / PP
Max. Packing Dimension	120mmD x 400mmH
Conveyor Speed	0 - 10 M/min
Conveyor Overall Loading Weight	10 Kg
Conveyor Type	Modular Chain Conveyor
Conveyor Dimension	1000mmL x 150mmW
Machine Structure	Metal with Powder Coated
Machine Weight	180 Kg
Machine Dimension	1500mmL x 1005mmW x 2100mmH
