Heavy Duty Vertical Impulse Sealer

Vertical Semi Automatic Impulse Sealer is special design for sealing heavy weight packaging, thick plastic film and bulk packaging. Double sides sealing is suited for heavy-duty bags and wet or dusty bags. Vertical Semi Automatic Impulse Sealer preventing loose products like powders and liquids from spilling when sealing. Vertical Impulse Sealer can operate alone or be collocated with conveyer or working table, to be linked to dosing and filling systems.

Heavy-duty Vertical Type Semi Automatic Impulse Sealer commonly used in the fields of animal feed, chemicals, aggregates, food, fertilizer, detergents, pet food, spices, sugar, grains and cereals, insulation, pellets, powders, etc.

QF Series Semi Automatic Pneumatic Impulse Sealer

QF Series Semi Automatic Pneumatic Double Impulse Sealers is heavy duty sealing machine. QF Series designed with two heating jaw (top and bottom) able to seal up to 18mil gusseted or regular thermoplastic film. This sealer is best for all sealing purposes. Sealing length up to 1000mm with 10mm sealing width.

QF Series Semi Automatic Pneumatic Impulse Sealer adopts with pneumatic cylinder required compressed air as motive power with adjustable sealing pressure and double heating sealer for reliable sealing quality. Machine complete with roller conveyor max carrying load of 50kgs and its sealing operation can be controlled by manual or by foot stamping.

TECHNICAL DATA

MODEL	QF1000L
Voltage	1 Phase 240V
Sealing Power	3500 W
Sealing Length	1000 mm
Sealing Width	10 mm
Sealing Jaw	Top & Bottom
Distance From Sealing Centre to Floor	1120 mm
Height of Packing Bag	450 - 750 mm
Film Thickness (Single)	≤0.18mm
Max. Sealing Loading	50 Kg
Sealing Head's Adjustable Angle	20 Degrees
Air Compressor (prepare by customer)	0.4 - 0.6 Mpa
Machine Structure	Powder Coated Metal
Machine Dimension	1120mmL x 560mmD x 1340mmH
Machine Weight	104kg
